

```
#include<stdio.h>

int main() {
    int n, i, term1 = 0, term2 = 1, nextTerm, sum = 0;

    // Input the number of terms in Fibonacci series
    printf("Enter the number of terms in Fibonacci series: ");
    scanf("%d", &n);

    printf("Fibonacci Series:\n");
    for (i = 0; i < n; i++) {
        // Print current term
        printf("%d ", term1);

        // Add current term to sum
        sum += term1;

        // Calculate next term
        nextTerm = term1 + term2;

        // Update terms for the next iteration
        term1 = term2;
        term2 = nextTerm;
    }

    // Print sum of the Fibonacci series
    printf("\nSum of the Fibonacci Series: %d\n", sum);

    return 0;
}
```

Enter the number of terms in Fibonacci series: 10

Fibonacci Series:

0 1 1 2 3 5 8 13 21 34

Sum of the Fibonacci Series: 88

Process exited after 12.1 seconds with return value 0
